MEMORANDUM FOR: Chief, Defensive Systems Division, OSI

ATTENTION: [REDACTED]

FROM: Chief, CIA/PID (NPIC)

SUBJECT: Pao-T'ou SAM Evaluation

REFERENCE: (a) Requirement OSI/R-163/63
(b) CIA/PID Project C 578-63

1. This memorandum is in answer to your requirement dated 29 April 1963 which requested analysis of the Pao-T'ou Test Range, formerly known as the Tu Ko Ma Ching Test Range, for possible SAM test facilities and an evaluation of the "four dot" configurations at Pao-T'ou, Dairen, China [REDACTED] for any similarities.

2. No possible SAM test facilities were identified at the Pao-T'ou Test Range. The "four dot" configurations at Pao-T'ou, Dairen, [REDACTED] have dimensional and configurational similarities, but this is not indicative of functional system similarities. Any road-mobile piece of gear which would require calibration would have tie-down points similar to the four-dot configuration for alignment.

3. The photo analyst on this project is [REDACTED] and he may be contacted on extension [REDACTED] should you have any further questions concerning this project.

4. This project is considered to be complete.

[REDACTED]
